

Programma di candidatura al Consiglio Direttivo SNO 2021-2023

Candidato: Dr Arturo Consoli, Neuroradiologo presso Hôpital Foch, Parigi

Il contesto scientifico attuale pone le neuroscienze in una posizione di prestigio e di maggiore attenzione mediatica, in particolare dall'avvento della pandemia da SARS-Cov2.

Infatti, se da un lato la situazione pandemica ha determinato disagi e disfunzionamenti a livello globale con effetti socio-economici devastanti, dall'altro ha spinto l'umanità, e, nella fattispecie, le comunità scientifiche a riformulare una modalità di comunicazione, di collaborazione e di condivisione differente rispetto al passato.

In questo ambito e per il periodo 2021-2022 il mio programma di candidatura prevede:

- **la realizzazione di 2 webinar internazionali**, dedicati agli specializzandi e ai neospecialisti italiani e francesi per potersi confrontare sul ruolo della formazione nei due paesi, **in continuità con quanto proposto con successo nel 1° SNO Youth Forum di Roma nel 2019;**
- **la realizzazione di un gruppo di studio internazionale multidisciplinare per studi di coorte su tematiche di Neuroradiologia Diagnostica e Interventistica**, con la programmazione di database comuni per favorire la produzione scientifica multicentrica
- la realizzazione di **un “laboratorio virtuale”** che permetta l'elaborazione di studi specifici su determinate tematiche a carattere interventistico **e la condivisione di protocolli di studio** (per citare un esempio, a Foch tre nuovi protocolli di ricerca sono stati aperti sotto la mia direzione e sono pronti per essere condivisi con altri centri nazionali e internazionali).

Per il 2022-2023 il programma di candidatura prevede di proseguire l'attività stabilita durante il primo anno di attività e, soprattutto, di **impostare in maniera metodologica un percorso di fellowship per i neospecialisti delle neuroscienze** come nuova tappa sperimentale nel percorso di formazione. L'impostazione metodologica di questo percorso permetterebbe una discussione più concreta con la comunità universitaria e con gli interlocutori ministeriali.

TEACHING ACTIVITIES

- Theoretical teaching

**Residency program – Faculty of Pharmacy
« Neuroradiology/ Simulation workshop », University Paris V**

- Practical teaching:

**Responsible for residents and fellows formative programme.
Simulation-based workshops and flow models for endovascular procedures of
mechanical thrombectomy (catheterisation and clot retrieval) and aneurysms treatment.**

Tutor of 5 Residency theses in Radiology:

- 2018 : “Association between acute ischemic stroke etiology and macroscopic aspect of retrieved clots: is a clot’s color a warning light for underlying pathologies?” **Dr Alessandro SGRECCIA – University of ANCONA, Italy. Published (Journal of Neurointerventional Surgery 2019)**
- 2018 : “Acute middle cerebral artery occlusion and underlying intracranial stenosis: clinico-neuroradiological patterns and therapeutic approaches.” **Dr Giuseppe CARITA’ – University of FERRARA, Italy (under submission)**
- 2019 : “Mechanical thrombectomy in distal residual occlusions after large vessel recanalization in anterior circulation stroke: 2b or not 2b?”
Dr Riccardo RUSSO – University of TURIN, Italy – Published (World Neurosurgery 2021)
- 2019 : « Therapeutic management of basal ganglia AVMs : a single center experience and a review of the literature »
Dr Bruno DEL SETTE - University of NOVARA, Italy (under submission)
- 2020 : « Impact of clot composition on the occlusion phenotype in M1-Middle Cerebral Artery occlusions. Focus on the effectiveness of mechanical thrombectomy».
Dr Silvia PIZZUTO - University of MODENA, Italy (under submission)

Tutor for final University Diplôme in Neuroradiology:

- 2020 : « Comparaison de différentes méthodes d’évaluation des vaisseaux cérébraux prédominants sur la séquence de susceptibilité magnétique dans le cadre de l’accident ischémique constitué aigu ». (« Comparison of different assessment of prominent cortical vessels in SWI in patients with acute ischemic stroke »)
